

## **The A. P. Dickman House**

**November 5, 2005**

**Written by Tania Sanchez**

*The Picture above is a current one. The house is beautiful. The trees and water around the house make it very peaceful! The home is located right on the Ruskin Inlet which is part of The Little Manatee River!*

The name of this building is the A. P. Dickman House. The beautiful A.P Dickman house was built in 1908.

The address of the A. P. Dickman house is 120 Dickman Drive South-West Avenue Ruskin, FL 33570 .

The A.P Dickman house was built for one of the Dickman brothers and his family. The A.P Dickman house was for their personal family residence.

The A.P Dickman house is very old, big, and it is beautiful with trees and bright colored flowers and bushes. It has beautiful trees and is located right on the water. The yard goes right up to the Ruskin Inlet which is a part of the Little Manatee River.

The A.P Dickman house is located in downtown Ruskin in a beautiful residential neighborhood. It is currently used as a house. The Dickman house is important because it is a historic home.

Some of it's outstanding features are the water it is located on, the great architecture, and the trees around the yard. The reasons why it is important is to save the A. P. Dickman house is because the house is part of the History of Ruskin. It is very important to save historic houses like this one because it helps us to remember what our communities past was like. Also so many people are moving here that we won't have any old houses left.
